The sketch illustrates a user interface for creating presentation decks. On the left, a vertical sidebar lists five templates: "Template 1", "Template 2", "Template 3", "Template 4", and "Template 5". To the right of this sidebar is a large main area. At the top of this area, there is a text input field labeled "slide name..." and a placeholder "Author Name" next to a user icon. Below these fields is a large rectangular area intended for slide content, with the word "Title" written in the center. To the left of this content area, there are several control buttons: a "T" button (text/icon), a camera button, a left arrow button, and two bottom buttons labeled "S" and "D".

The sketch depicts a desktop application window titled "SLIDEWINDER". On the left side, there are four vertical stacks of rectangular cards, each labeled "DECK 1". In the center, two large rectangular boxes represent existing decks, each with a circular cursor icon in the bottom right corner. To the right of these boxes is a smaller box containing a plus sign (+). Below the central area is a text input field with placeholder text: "DRAG TO EXISTING DECK", "OR", "FIND: [text input]", "OR", and "CREATE NEW: [text input]".

The interface is a 'pick-and-mix' slide deck builder. On the left, input fields for 'Deck Name', 'Author', and 'Description' are followed by three numbered boxes (1, 2, 3) pointing to specific slides in the grid. The main area displays a 3x4 grid of 12 slide thumbnails. Each thumbnail is a rectangle with a thin border, a horizontal bar near the bottom, and a small circular icon in the bottom right corner. Above the grid are four buttons: 'Deck Name', 'Author', 'Description', and three numbered boxes (1, 2, 3) pointing to specific slides. Below the grid are two buttons: 'Finish' and 'View'. At the top right, there's a menu with icons for 'CREATE SLIDE', 'CREATE DECK', 'PRESENT DECK', 'MANAGE LIBRARY', 'HELP', and 'EXIT', along with a user status message 'logged in as: Blahah'.
